Subject: I-270 Air Reports Comments and strategy

Hi Julie,

Greg and I reviewed the I-270 reports and did not have substantive comments. However, there were more files than could be reviewed in our week review period. Those files include MOVES files and AERMOD files.

Therefore, I recommend providing CDOT/FHWA the following feedback (or something similar):

Thank you for providing EPA the opportunity to review the three documents prepared to support the I-270 NEPA analysis. We do not have comments at this time. However, we have not been able to conduct a full review of all the files that were included to support the air quality reports. Should further review identify areas where we may have recommendations we would like to be able to share those with CDOT/FHWA. Thank you...

It was not initially clear that the modeling has been conducted and that there would be AERMOD files that would also be put on the ftp site. Since we didn't have much time with this I'm going to send a meeting invite for us to touch base on the information we have and what level of scrutiny of the information we've received is appropriate.

Ex. 6 Personal Privacy (PP)

Including MOVES and AERMOD files

Please let me know if you have any questions. Thanks so much,

Chris
